IMA AMS (Indian Medical Association Academy of medical Specialities) Fellowship course in infertility is for one year duration, monthly two theory classes and two practical classes to be conducted by GarbhaGnan institute of training which is a sister concern of GarbhaGudi IVF centre.

About GarbhaGnan

Garbhagnan is a knowledge repository built to provide top notch training, Training sessions and workshops for knowledge sharing with the fraternity will be the primary aim of GarbhaGnan. A wide choice of online and offline courses are available and these offer phenomenal learning opportunity to gynaecologists, general practioners, medical students, urologists, science graduates and also for para-medical staff. It is established by the fastest growing chain of fertility hospitals to spread their expertise and success in infertility and reproductive technologies.

All aspects of reproductive health will be covered like

- ▶ Workup of a sub fertile male and female
- ▶ Normal anatomy and endocrinology of the male and female partner
- ▶ Medical and surgical treatment of the male
- ▶ IUI stimulation and protocols
- ▶ IVF stimulation, assessment, challenges and hands on experience of OPU/ET
- ▶ Recent advances in infertility
- ▶ Setting up of an IUI/ IVF lab
- ▶ Basic embryology - theory and practical's

GarbhaGudi IVF Centre is a prestigious IVF centre in Bangalore with four well-equipped centres in all directions of the city. It is renowned for scientific approach, caring attitude and amazing success rates. This fellowship program will make the students (gynaecologist) to imbibe all these great attributes, which can really enhance the quality care of their infertility practice.

The fellowship certificate will be issued after 3 to 4 months of the exam at IMA AMS headquarters. These courses are not recognised by the MCI (Medical Council of India). Only 25 candidates will be selected for the first batch, so that they have a unique private teaching experience and one on one attention to everybody.

At the end of the course you will be

- ▶ Able to assess the infertile male & female in a very methodical fashion
- ▶ Pinpoint the problem & address it
- ▶ Able to stimulate the lady efficiently for IUI procedure
- ▶ Perform IUI procedure in a well-disciplined way at your clinic
- ▶ Do your own IVF stimulation (with the help of our consultants as well)
- ▶ Monitor your stimulations ultrasonologically (if you have basic ultrasound knowledge already)
- ▶ Experience good success rates in both IUI & IVF stimulations
- ▶ Hands on experience with both Ovum pick up and embryo transfer (simulators with virtual reality models)
- ▶ Protocols for Frozen embryo transfer will be completely understood and can be practiced at your clinic
- ▶ Challenges of IVF/ICSI stimulations will be known & the knowledge to prevent it or tackle it if happens
